## Lung-Term Learning – Our New Digital FAQ Series

**Leading Experts from EMEA Answer Procedure-Related FAQs.**

There's nothing quite as effective as learning from experts in their respective fields. With our new Lung-Term Learning initiative, we want to further elevate the standard of care by creating a pulmonology community and broaden our offer for education beyond our medical expert trainings.

We would like to invite you to watch our “Lung-Term Learning” videos, where renowned experts will be sharing procedure-and education-related tips and tricks on how to further improve procedural outcomes and to help in our efforts to further elevate the standard of care in lung cancer diagnosis and staging.

Check out the first episode of our FAQ series and stay tuned for upcoming videos.
